Tylö Sauna Heater Specifications Tylö – Best in Test!

Time and time again in tests with three other (Finnish) [sauna heaters](#), Tylö comes out top.

[Tylö](#) asked SEMKO, a highly reputable, independent testing institute in Sweden, to carry out tests on four different brands of sauna heater.

The tests were designed to assess and compare key criteria for [sauna heater](#) performance, such as heating-up time, energy consumption, water sprinkling capacity and the temperature of the outer mantle.

The tests were carried out under identical conditions with each sauna heater installed and operated in accordance with the manufacturer's instructions.

The sauna heaters in the test were: Tylö Sport 6, Helo 1714-60-1718, Harvia Trendi/Kip-60 and Harvia Termonator 6/M60.

The test proved Tylö's unrivalled superiority in all areas – the quickest heating-up time, the lowest energy consumption, unsurpassed water sprinkling capacity and the lowest temperature of the outer mantle.

Tylö Sport 6 which took part in the test, is Tylö's standard model. For even more impressive performance and more sophisticated features, choose a Tylö MP, SE, SD or Combi sauna heater.
